Defining The Curriculum - Ivor F. Goodson
2012-05-23

This book explores some of the major processes involved in the definition of school subject

knowledge. Using historical ethnographic methods, the contributors to the collection highlight and examine some of the factors involved at national, institutional and classroom levels in the making of school subjects. The first section of the book outlines the theoretical and methodological basis for the study of school subjects, and the reasons for and the possibilities of such a study are considered. In the second section some histories of school curricula are presented from a variety of settings - colonial schools in Africa, working-class schools of the nineteenth century, nursery schools - and the conflicting forces of determination and change in school subjects are identified and examined. The third section focuses on the contemporary school situation and the papers isolate and investigate some of the interest groups and social processes which enter into or affect the realization of school knowledge in the classroom.

Teaching and Learning Foreign Languages -

Nicola McLelland 2017-07-14

Teaching and Learning Foreign Languages provides a comprehensive history of language teaching and learning in the UK from its earliest beginnings to the year 2000. McLelland offers the first history of the social context of foreign language education in Britain, as well as an overview of changing approaches, methods and techniques in language teaching and learning. The important impact of classroom-external factors on developments in language teaching

and learning is also taken into account, particularly regarding the policies and public examination requirements of the 20th century. Beginning with a chronological overview of language teaching and learning in Britain, McLelland explores which languages were learned when, why and by whom, before examining the social history of language teaching and learning in greater detail, addressing topics including the status that language learning and teaching have held in society. McLelland also provides a history of how languages have been taught, contrasting historical developments with current orthodoxies of language teaching. Experiences outside school are discussed with reference to examples from adult education, teach-yourself courses and military language learning. Providing an accessible, authoritative history of language education in Britain, Teaching and Learning Foreign Languages will appeal to academics and postgraduate students engaged in the history of

education and language learning across the world. The book will also be of interest to teacher educators, trainee and practising teachers, policymakers and curriculum developers.

English and Its Teachers - Simon Gibbons
2017-04-21

English and Its Teachers offers a historical overview of the development of secondary English teaching in schools over the past 50 years. Initially charting the rise of a new progressive approach in the 1960s, the book then considers the implications for the subject and its teachers of three decades of central policy intervention. Throughout, document and interview data are combined to construct a narrative that details the fascinating and, at times, turbulent history. The book is divided into two main parts - 'The age of invention' and 'The age of intervention'. The first of these sections details how innovative English teachers and academics helped to develop a new model. The second section explores how successive governments have sought to shape English through policy. A final part draws comparisons

with the teaching of the subject in other major English-speaking nations and considers what the future might hold. *English and Its Teachers* is a valuable resource for those interested in the teaching of English in secondary schools, from new entrants to the profession, to experienced teachers and academics working in the sector.

Teaching English in Swaziland - Sarah Mkhonza 2011-12-14

The book, Teaching English in Swaziland: The Life and Days of Gordon Thomas is about Gordon the teacher and mentor. His life at Manzini Nazarene is one that all his students remember as filled with great moments of teaching and learning. In this book his ideas on teaching are written about in a semi-fictional manner that enables readers to think about their own teaching. The dedication he brought to the teaching task has been analyzed to bring out how he taught composition, poetry, drama and the novel. His students in the class of 75 called

him Chaucer. We thank York University and the Church of the Nazarene for making it possible for such a great teacher and thinker to sow into our lives. His students have grown to be professors, ministers, ambassadors and many other important careers that are serving the nation of Swaziland in wonderful ways. The life of a Christian teacher is something that can never be replaced in the lives of students. Gordon will be remembered in all the countries around the world where he worked for all that he gave. Gordon Thomas died of melanoma cancer in 2006.
