The languages compared here are both major and minor, European and non-European, and the text includes contrastive analyses of the most commonly investigated languages (French-German, English-Spanish, Russian-German), as well as some less frequently investigated languages (like Ukrainian, Romanian, Georgian and Thai), which are not as well-represented in phraseological description, despite their scientific interest.

Food and Drink Idioms in English - Laura Pinnavaia 2019-01-10

Idioms carry an aura of mystery for all speakers, owing to the discrepancy between their literal and non-literal meanings. This book clears up some of these ambiguities, by examining a series of expressions that have derived from the most instinctive and essential of all human behaviour: eating and drinking. The quantity and quality of 276 food and drink idioms are explored, investigating two hundred and fifty years of English monolingual lexicography and forty years of usage as attested by contemporary linguistic corpora. The examination of these idioms' syntactic, semantic, pragmatic, historical, social and cultural characteristics will foster in speakers a whole new approach to idiom

comprehension and usage, and will constitute thought-provoking ground for further research in other idiom domains.
