CliffsNotes Grade 7 Common Core Math Review - Sandra Luna McCune
2015-06-30

Nearly half of adults, including parents of middle-school students, have never heard of the Common Core State Standards, let alone have a working knowledge of what exactly their children face when it comes to middle-school math. Even teachers acknowledge struggling with how best to teach their students these math standards. CliffsNotes comes to the rescue with this Grade 7 Common Core Math Review. Aligned to the state standards, this book provides essential coverage of the Grade 7 CCSS math that's challenging middle-school students, teachers, and parents alike. The material covers all of the math standards that comprise Grade 7 CCSS math: • Ratios and proportional relationships • The number system • Geometry • Expressions and equations • Statistics and probability Two practice tests round out the book, plus every review chapter includes example problems.

Argo Brothers Math Workbook, Grade 7 - Argo Brothers Inc
2016-11-12

Mindset Mathematics: Visualizing and Investigating Big Ideas, Grade 7 - Jo Boaler 2019-08-27

Engage students in mathematics using growth mindset techniques The most challenging parts of teaching mathematics are engaging students and helping them understand the connections between mathematics concepts. In this volume, you'll find a collection of low floor, high ceiling tasks that will help you do just that, by looking at the big ideas at the seventh-grade level through visualization, play, and investigation. During their work with tens of thousands of teachers, authors Jo Boaler, Jen Munson, and Cathy Williams heard the same message--that they want to incorporate more brain science into their math instruction, but they need guidance in the techniques that work best to get across the concepts they needed to teach. So the authors designed Mindset Mathematics around the principle of active student engagement, with tasks that reflect the latest brain science on learning. Open, creative, and visual math tasks have been shown to improve student test scores, and more importantly change their relationship with mathematics and start believing in their own potential. The tasks in Mindset Mathematics reflect the lessons from brain science that: There is no such thing as a math person - anyone can learn mathematics to high levels. Mistakes, struggle and challenge are the most important times for brain growth. Speed is unimportant in mathematics. Mathematics is a visual and beautiful subject, and our brains want to think visually about mathematics. With engaging questions, open-ended tasks, and four-color visuals that will help kids get excited about mathematics, Mindset Mathematics is organized around nine big ideas which emphasize the connections within the Common Core State Standards (CCSS) and can be used with any current curriculum.
