National Association of Broadcasters Engineering Handbook - Graham A. Jones 2007
The NAB Engineering Handbook provides detailed information on virtually every aspect of the broadcast chain, from news gathering, program production and postproduction through master control and distribution links to transmission, antennas, RF propagation, cable and satellite. Hot topics covered include HD Radio, HDTV, 2 GHz broadcast auxiliary services, EAS, workflow, metadata, digital asset management, advanced video and audio compression, audio and video over IP, and Internet broadcasting. A wide range of related topics that engineers and managers need to understand are also covered, including broadcast administration, FCC practices, technical standards, security, safety, disaster planning, facility planning, project management, and engineering management. Basic principles and the latest technologies and issues are all addressed by respected professionals with first-hand experience in the broadcast industry and manufacturing. This edition has been fully revised and updated, with 104 chapters and over 2000 pages. The Engineering Handbook provides the single most comprehensive and accessible resource available for engineers and

others working in production, postproduction, networks, local stations, equipment manufacturing or any of the associated areas of radio and television. * An National Association of Broadcasters official publication * Over 100 industry leaders combine their knowledge and expertise into one comprehensive reference * Completely revised to add many new technologies such as HDTV, Video over IP, and more

The Fast Track to Your Technician Class Ham Radio License - Michael Burnette 2018-05-24
NOTE: THIS EDITION OF THE FAST TRACK TO YOUR TECHNICIAN CLASS HAM RADIO LICENSE IS NOW OUT OF DATE. The question bank changed effective July 1, 2018. The new edition, covering all the current questions, is available in e-book, paperback, large print edition, and audio. Memorizing answers is hard. Learning is easy! The Fast Track to Your Technician Ham Radio License explains the reasoning and technology behind each correct answer on the Amateur Radio exam so you'll understand and remember the subject matter. Created by an experienced ham and adult educator, it's like having your own, patient, experienced, good-humored mentor for the exam. Technician is the entry-level ham radio license that lets you operate on all ham channels from 30 MHz up, which includes the very popular VHF and UHF bands. To get your license you must pass a multiple-choice test. The Technician license test consists of 35 questions

drawn from a pool of about 350. Memorizing the answers to 350 questions is difficult, but The Fast Track makes getting your license easy by explaining the logic behind each correct answer, and by arranging the questions so they form a logical progression toward mastery of the material. It's simple: When you understand the subjects, you remember the answers and pass the test. Best of all, once you've passed your exam you'll have a solid grounding in ham radio basics. - Includes every possible question and every answer - Correct answers clearly marked in bold - Precise instructions for how to locate a testing session, how to prepare, and even what to bring -- and what not to bring -- to the test. - All technical topics explained in clear, plain language, most with illustrations - Step by step instructions to solve all the math problems, complete with exactly which keys to press on your calculator for each problem - Test taking strategies - Hints to easily solve many questions and avoid the traps in the test - Written in "learning order", not just the order of the official question bank. - Full index of topics and questions (print edition) - Covers questions that will be used until June 30, 2018. - Nearly 300 pages packed with information Michael Burnette, AF7KB, holds an Amateur Extra class license. He has decades of experience in commercial and amateur radio, and more decades of experience as a professional adult educator.
