Bibliography of Faculty Publications - University of Pennsylvania 1948

*Cost Accounting* - Cecily A. Raiborn 2005-02-01

The most practical, real-world presentation of cost accounting on the market, this book blends a traditional and proven method of teaching cost accounting with the integration of innovative topics. Cost topics are covered in the context of organizational strategy and operational tactics, as cost management decisions are sensitive to strategies driven by quality, cost, and innovation. Kinney, Prather-Kinsey, and Raiborn reinforce the material with real-world examples and visual illustrations that bring cost management techniques into the student's sphere of understanding. A flexible organization appropriate for either a one- or two- semester course--coupled with clear and abundant visual presentations--allows students to clearly understand difficult topics. The text's revised organizational structure streamlines chapter materials as well as reduces redundancy between cost accounting and other business courses.

Service Business Costing - Markus B. Baum 2012-08-17

Service firms have high overhead costs which are difficult to assign to individual services. To bring transparency to their value chain, they need costing approaches that help them find their own improvements. Markus B. Baum explores current theory and practice of value chain approaches and cost accounting to develop a costing approach with a suitable instrument for the allocation of fixed and overhead costs for a service firm. He describes the service business costing (SBC) approach. This hybrid-costing model has a hierarchical structure in terms of consolidation and allocates cost and revenues on the lowest hierarchical level possible to ensure that all costs and income are assigned to activities from which they originated.

Catalogue of the Trustees, Officers, and Students, of the University ... and of the Grammar and Charity Schools ... - University of Pennsylvania 1963

Accounting and Costs as Tools of Management for Control and Analysis - Adolph Matz 1959

*University of Pennsylvania Bulletin* - University of Pennsylvania 1959

*Journal of Research on Computing in Education* - 1988

*Topics in Classical Micro- and Macroeconomics* - Peter Flaschel 2010-03-14

This book on Classical micro- and macrodynamics includes revised versions of papers which were written between 1983 and 2000, some jointly with co-authors, and it supplements them with recent work on the issues which are raised and treated in them. It attempts to demonstrate to the reader that themes of Classical economics, in particular in the tradition of Smith, Ricardo and Marx, can be synthesized into a coherent whole, from the perspective of formal model building. This is accomplished by means of mathematical techniques which, on the one hand, provide a consistent accounting framework (labor values and prices of production) as point of reference for Classical micro- and macrodynamics and which, on the other hand, attempt to apply these accounting schemes - or suitable extensions of them - by showing their usefulness as tools of analysis of the implications of technological change (labor values) and as potential tools for understanding the dynamics of market prices and of income distribution around their centers of gravity (production prices and the wage-profit curve).

**Cost Accounting** - Lawrence H. Hammer 1994

Catalog of Copyright Entries. Third Series - Library of Congress. Copyright Office 1964

**Cost Accounting** - Edward J. Vnderbeck 2002-02-01

Horngrén's "Cost Accounting" defined the cost accounting market and continues to innovate today by consistently integrating the most current practice and theory. This acclaimed, number one market-leading book embraces the basic theme of "different costs for different purposes." It reaches beyond cost accounting procedures to consider concepts, analyses, and management. This latest edition of "Cost Accounting" incorporates the latest research and most up-to-date thinking into all relevant chapters. Professional issues related to Management Accounting and Management Accountants are emphasized. Chapter topics cover the accountant's role in the organization to performance measurement, compensation, and multinational considerations. For future accountants who want to enhance their understanding of and ability to solve cost accounting problems.
