Looking to experience more world-class cities? Try Moon Boston or Moon Chicago. Exploring the rest of the Empire State? Check out Moon New York State or Moon Niagara Falls.

[Shaping the Network Society](#) - Douglas Schuler 2003-01-01

How computer professionals and communities can work together to shape sociotechnical systems that will meet society's challenges. Information and computer technologies are used every day by real people with real needs. The authors contributing to Shaping the Network Society describe how technology can be used effectively by communities, activists, and citizens to meet society's challenges. In their vision, computer professionals are concerned less with bits, bytes, and algorithms and more with productive partnerships that engage both researchers and community activists. These collaborations are producing important sociotechnical work that will affect the future of the network society. Traditionally, academic research on real-world users of technology has been neglected or even discouraged. The authors contributing to this book are working to fill this gap; their theoretical and practical discussions illustrate a new orientation—research that works with people in their natural social environments, uses common language rather than rarefied academic discourse, and takes a pragmatic perspective. The topics they consider are key to democratization and social change. They include human rights in the "global billboard society"; public computing in Toledo, Ohio; public digital culture in Amsterdam; "civil networking" in the former Yugoslavia; information technology and the international public sphere; "historical archaeologies" of community networks; "technobiographical" reflections

on the future; libraries as information commons; and globalization and media democracy, as illustrated by Indymedia, a global collective of independent media organizations.

The Rough Guide to Korea - Norbert Paxton 2008-08

Make the most of your time with The Rough Guide to Korea, the ultimate guide to this stunning region. Covering both North & South Korea, the full-colour section introduces the countries highlights, from the shrines, temples and palaces of Seoul to the broad stretches of paddy field in the Chungcheong provinces. With informed accounts and unparalleled coverage, clue-up on all the top sights from the small coastal towns and remote forested mountains of Eastern Korea to the rich rice fields of Korea's South Western area with coverage all the islands, from Jeju Island to Ulleungdo. The guide takes a detailed look at Korean history, culture and wildlife with expert background on everything from Korean cuisine to hiking South Korea's national parks to taking a tour in North Korea. There are plenty of practical tips and information on all the best accommodation, transportation, including visiting North Korea from South, and lively reviews of hundreds of shops, restaurants, bars and clubs. Discover every corner of Korea with the clearest maps of any guide.

The Digital City - Germaine R. Halegoua 2020-01-21

Shows how digital media connects people to their lived environments Every day, millions of people turn to small handheld screens to search for their destinations and to seek recommendations for places to visit. They may share texts or images of themselves and these places en route or after their journey is complete. We don't consciously reflect on these activities and probably don't associate these practices with constructing a sense of place. Critics have argued that digital media alienates users from space and place, but this book argues that the exact opposite is true: that we habitually use digital technologies to re-embed ourselves within urban environments. The Digital City advocates for the need to rethink our everyday interactions with digital infrastructures, navigation technologies, and social media as we move through the world. Drawing on five case studies from global and mid-sized cities to illustrate the concept of "re-placeing," Germaine R. Halegoua shows how different populations employ urban broadband networks, social and locative media platforms, digital navigation, smart cities, and creative placemaking initiatives to turn urban spaces into places with deep meanings and emotional attachments. Through timely narratives of everyday urban life, Halegoua argues that people use digital media to create a unique sense of place within rapidly changing urban environments and that a sense of place is integral to understanding contemporary relationships with digital media.

Getting from Here to There? Power, Politics and Urban

Sustainability in North America - Ernest J. Yanarella 2016-05-04

Getting from Here to There? seeks to take the study of sustainable cities into a realm of analysis and critique that has not been seriously investigated in any explicit and systematic manner: the sphere of power and politics. Using detailed case studies of selected urban sustainability programs—some stillborn or short-lived, others celebrated, still others most promising—it focuses on the political agencies shaping them and the structural elements either impeding or facilitating efforts to build sustainable cities. To accomplish this task, the authors utilize three theories or models of urban power-growth coalition, urban regime, and neo-Gramscian hegemonic—to explore the dynamics of power and politics to better understand these cases and to derive important lessons about getting from here to there. These models offer valuable lessons for ongoing or future sustainable city programs, community or business groups, key policy makers, grassroots organizations, mayors, and urban planners involved in or contemplating moving urban sustainability projects forward, as well as students of urban politics and environmental and sustainability researchers.

Strategic Place Branding Methodologies and Theory for Tourist Attraction - Bayraktar, Ahmet 2016-08-15

Drawing the attention of tourists to different destinations around the world assists in the overall economic health of the targeted region by increasing revenue and attracting investment opportunities, as well as increasing cultural awareness of the area's population. Strategic Branding Methodologies and Theory for Tourist Attraction investigates international perspectives and promotional strategies in the topic area of place branding. Highlighting theoretical concepts and marketing techniques being utilized in the endorsement of various destinations, regions, and cities around the world, this publication is a pivotal reference source for researchers, practitioners, policy makers, students, and professionals.

Morality Politics in American Cities - Elaine B. Sharp 2005

Topless bars, casino gambling, needle exchange programs for drug addicts—there's no question, morality issues remain front and center in urban politics. Presenting a systematic analysis of culture-war issues at the local level, Elaine Sharp shows how American cities deal with these ongoing concerns. Drawing on a sample of ten strategically chosen cities, she explains differences in how municipalities respond to controversies surrounding sex business, abortion clinics, legalized gambling, gay rights, and drug use. By analyzing the relative importance of subculture, economics, and institutional arrangements in the disputes, she points the way toward richer and more complete understanding of how different cities respond differently to these hot-button issues. Far more than a statistical study, *Morality Politics in American Cities* is a collection of fascinating stories of real people grappling with down-to-earth issues and real-life drama—richly informative case studies that will captivate students and interested citizens alike. Mayors, public health directors, activists, and others speak their minds about the pros and cons of these controversies. Here are officials in one city confronting the Vatican over funding for abortion services, those in another battling a local university over its refusal to provide health benefits to gay partners of faculty members, and still others mounting a massive, community-sponsored attack on topless clubs. These stories provide detailed evidence to support classifications needed for comparing cities' experience with each of the five morality issues. They also corroborate inferences drawn from the comparisons by showing what considerations were in play as local officials grappled with these issues. Overall, the study shows that cultural factors usually dominate policymaking in local politics—except when specific economic interests are at stake—and also observes that county-level governments are more important than previously thought in terms of morality-issue decisions. As provocative as it is informative, *Morality Politics in American Cities* demonstrates that such issues—same-sex marriage, for example—are multidimensional and often difficult to resolve. Its conclusions, however contingent, mark an important step in the ongoing process of understanding important differences in approaches to these issues and clearly show how moral conflicts continue to define American politics.

Working on a Song - Anaïs Mitchell 2020-10-06

"Working On A Song is one of the best books about lyric writing for the theater I've read."—Lin-Manuel Miranda Anaïs Mitchell named to TIME's List of the 100 Most Influential People in the World of 2020 An illuminating book of lyrics and stories from *Hadestown*—the winner of eight Tony Awards, including Best Musical—from its author, songwriter Anaïs Mitchell with a foreword by Steve Earle On Broadway, this fresh take on the Greek myth of Orpheus and Eurydice has become a modern classic. Heralded as "The best new musical of the season," by *The Wall Street Journal*, and "Sumptuous. Gorgeous. As good as it gets," by *The New York Times*, the show was a breakout hit, with its poignant social commentary, and spellbinding music and lyrics. In this book, Anaïs Mitchell takes readers inside her more than decade's-long process of building the musical from the ground up—detailing her inspiration, breaking down the lyrics, and opening up the process of creation that gave birth to *Hadestown*. Fans and newcomers alike will love this deeply thoughtful, revealing look at how the songs from "the underground" evolved, and became the songs we sing again and again.

Transforming Heritage Practice in the 21st Century - John H. Jameson 2019-06-14

Recent years have witnessed a rapid increase in the fields of cultural heritage studies and community archaeology worldwide with expanding discussions about the mechanisms and consequences of community participation. This trend has brought to the forefront debates about who owns the past, who has knowledge, and how heritage values can be shared more effectively with communities who then ascribe meaning and value to heritage materials. Globalization forces have created a need for contextualizing knowledge to address complex issues and collaboration across and beyond academic disciplines, using more integrated methodologies that include the participation of non-academics and

increased stakeholder involvement. Successful programs provide power sharing mechanisms and motivation that effect more active involvement by lay persons in archaeological fieldwork as well as interpretation and information dissemination processes. With the contents of this volume, we envision community archaeology to go beyond descriptions of outreach and public engagement to more critical and reflexive actions and thinking. The volume is presented in the context of the evolution of cultural heritage studies from the 20th century “expert approach” to the 21st century “people-centered approach,” with public participation and community involvement at all phases of the decision-making process. The volume contains contributions of 28 chapters and 59 authors, covering an extensive geographical range, including Africa, South America, Central America, Western Europe, Eastern Europe, North America, and Australasia. Chapters provide exemplary cases in a growing lexicon of public archaeology where power is shared within frameworks of voluntary activism in a wide diversity of cooperative settings and stakeholder interactions.

Managing Public Sector Projects - David S. Kassel 2017-09-25

Filling a gap in project management literature, *Managing Public Sector Projects: A Strategic Framework for Success in an Era of Downsized Government* supplies managers and administrators—at all levels of government—with expert guidance on all aspects of public sector project management. From properly allocating risks in drafting contracts to dealing with downsized staffs and privatized services, this book clearly explains the technical concepts and the political issues involved. In line with the principles of Total Quality Management (TQM) and the PMBOK® Guide. David S. Kassel establishes a framework those in the public sector can follow to ensure the success of their public projects and programs. He supplies more than 30 real-life examples to illustrate the

concepts behind the framework—including reconstruction projects in Iraq, the Big Dig project in Boston, local sewer system and library construction projects, and software technology. This authoritative resource provides strategic recommendations for effective planning, execution, and maintenance of public projects. It also: Highlights the differences between managing projects in the public sector versus the private sector Explains how to scrutinize costs, performance claims, and the backgrounds of prospective contractors Presents key safeguards that should be included in all contracts with contractors, consultants, suppliers, and other service providers Details the basics of project cost estimation, design and scheduling, and how to hold contractors responsible for meeting established project standards In an age of downsized government and in the face of a general distrust of public service, this book is a dependable guide for avoiding management practices that are common to projects that fail and for adopting the practices common to projects that succeed in terms of cost, schedule, and quality.
